PROFESSIONAL SUMMARY

AI/ML undergraduate at AJ Institute of Engineering & Technology with hands-on experience in Machine Learning, Full-Stack Development, and Generative AI. Developed AI-powered applications including Face Recognition Attendance Systems, AI Speech-to-Text tools, Stock Prediction Models, and responsive web applications. Passionate about building intelligent systems that solve real-world problems.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, HTML, CSS

Frontend: React.js, Next.js

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, PostgreSQL, Mongoose

AI / ML: Machine Learning, Prompt Engineering

Tools: Git, GitHub, Vercel, Render, Figma, Canva

PROJECTS

ClientX – AI-Powered CRM & Project Management Platform

- Engineered a full-stack CRM and project management platform using React, Node.js, Express, TypeScript, and MongoDB/Mongoose, supporting workspaces, projects, epics, and tasks with role-based permissions.
- Implemented secure authentication via Google OAuth and email login, with granular role/permission management and team invitation workflows
- Integrated a Gemini-powered AI assistant with per-user, persisted AI chat history for context-aware interactions.

AI-Based Elderly Fall Detection Wearable System

- Designed and developed an AI-powered IoT wearable system for real-time elderly fall detection using ESP32 microcontroller and MPU6050 motion sensor.
- Built a TensorFlow Lite CNN-based detection system to analyze motion patterns and identify fall events.
- Integrated Blynk IoT-based alert notifications, vibration motor to enable immediate emergency response during fall events.

Face Recognition Attendance System

- Developed an AI-powered attendance system using Python, OpenCV, and face recognition algorithms for real-time user identification.
- Implemented a complete face detection and recognition pipeline to capture, verify, and automatically record attendance.
- Built Streamlit interface for user management and attendance monitoring.

AI / GENAI EXPERIENCE

ClientX AI Assistant: Integrated the Google Gemini API into ClientX to power an in-app AI assistant, applying prompt engineering to deliver context-aware responses, with persisted user-specific chat history for continuity across sessions.

AI Fall Detection Sense (AI/IoT Wearable): Built an embedded IoT system using AI-based motion sensing for real-time fall detection, triggering emergency alerts on real-time event detection.

EXPERIENCE

Artificial Intelligence Intern – Codec Technologies India

Feb 2026 – Mar 2026

- Completed a 1-month Artificial Intelligence internship focused on AI concepts and practical implementations.
- Worked on AI workflows and improved knowledge in machine learning development and problem solving.

Software Development Intern – MyDailyWork

2025

- Developed React and TypeScript components using Tailwind CSS.
- Converted Figma designs into reusable responsive frontend components.

Web Development Intern – CodSoft

2024

- Built frontend projects including portfolio website, landing page, and calculator application.
- Applied JavaScript, HTML, CSS, and responsive design principles.

EDUCATION

B.E. Computer Science & Engineering (AI & ML)

AJ Institute of Engineering and Technology, Mangaluru | CGPA: 8.11

Aug 2023 – May 2027 (Expected)

CERTIFICATIONS

Generative AI with Diffusion Models — AWS Training & Certification

Introduction to Database Management System — NPTEL IIT Kharagpur

Cloud Computing using Microsoft Azure — Infosys Springboard

ACHIEVEMENTS

- VTU State-level Kabaddi Winner.
- Mini project competition Winner (2024) at AJ Institute of Engineering Technology.
